

RAYANAGOUD NADAGOUDRA

GenAI/ Agentic AI /Python Engineer

7483129220 | rayannabn0909@gmail.com | [portfolio](#)

Profile Summary

An **engineer** who cares about performance, accessibility and design. I enjoy turning fuzzy problems into polished, intuitive user experiences and shipping code that lasts.

Dynamic Python Developer delivering enterprise-grade backend solutions and intelligent automation systems. Expert in leveraging AI technologies to build scalable applications that transform business operations, enhance efficiency, and achieve measurable return on investment.

Core Expertise

- **Emerging Technologies:** GenAI, MCP Server, RAG, OpenAI, LangChain, LangGraph, LLM, Agentic AI, Vector Databases, Token, Embeddings, Transformer, Machine Learning Algorithms.
- **Backend Development:** Python, Django, Flask, REST APIs, Microservices, FastAPI.
- **Cloud & DevOps:** Docker, CI/CD, AWS, GCP, OVH, Gunicorn, CronJobs, Nginx .
- **Databases:** MongoDB, PostgreSQL, NOCODB, MySQL

Professional Experience

Vsplash Techlabs Private Limited- Hyderabad, TG

July 2025 – Present

Project: AI Powered SEO Audit Automation | **Clients:** GoDaddy, Salesforce

Python Developer - III | R & D Automation Team, Engineering

- Developed an AI-powered **SEO Audit Automation** Platform for WordPress websites.
- Processed an average of 11,000+ audit orders per month while ensuring reliable and scalable workflow execution. And a total of around 1,20,000 orders were delivered.
- Implemented **RAG-based retrieval** to provide relevant SEO guidelines and audit context to the LLM for more accurate responses.
- Developed **Agentic AI workflows using LLMs and tools/APIs** to autonomously retrieve audit data, analyze SEO issues, determine the next action, and generate actionable recommendations.

Deep Cognition India Pvt. Ltd – Bengaluru, KA

May 2023 – July 2025

Product Name: Paperentry | **Clients:** Savino SA, SALAS, VectorGL

Associate Software Engineer, Customer Success Engineer

- Configured and deployed an **MCP server for PaperEntry**, integrating it with **LibreChat** to enable natural-language access to operational reports and analytics, including failure rates, extraction accuracy, supplier/customer statistics, and audit performance metrics
- Implemented seamless data migration processes with optimized configurations, reducing operational costs.
- Enhanced the Technologies of the PaperEntry application using LLM and OpenAI for the various Document processing.
- Implemented system integration between Customer software and **PaperEntry**, enabling seamless data flow between platforms. (**Cargowise, NetCHB, MercureGate**)

Profinch Solutions Pvt Ltd. – Bengaluru, KA

Jul 2022 – May 2023

Software Consultant | Clients: Internal Project

- Developed a CRUD REST API using Flask with clean and modular code structure.
- Added authentication, error handling, and validation for secure and reliable API usage.
- Containerized and deployed the API using Docker and GCP, with Postman testing.
