

RAYANAGOUD NADAGOUDRA

GenAI | Agentic AI | RAG | MCP | Python Engineer

7483129220 | rayannabn0909@gmail.com | [portfolio](#)

GenAI and Python Engineer with 4+ years of experience building AI applications and scalable backend systems. Hands-on experience with LLMs, RAG, Agentic AI, LangChain, LangGraph, MCP, and FastAPI. Built production AI automation workflows processing 11,000+ orders per month.

Available for **immediate joining** and **Open to Relocate**.

Core Expertise

- **Generative AI & AI:** GenAI, Agentic AI, LLM, RAG, LangChain, LangGraph, MCP, Embeddings, Vector Databases, OpenAI, Machine Learning Algorithms
- **Backend:** Python, FastAPI, Flask, Django, REST APIs, Microservices, distributed system
- **Cloud & DevOps:** Docker, CI/CD, AWS, GCP, Nginx, Gunicorn, uvicorn, system design
- **Databases:** MongoDB, PostgreSQL, MySQL, Faiss
- **Tools:** Devin, Windsurf, Claude, Codex, Antigravity, vs code, copilot, LibreChat, MLflow
- **Models :** GPT-4o, GPT-4o-mini, Claude 3.5 Sonnet, Llama 3, OpenAI Embeddings (text-embedding-3-small)

Professional Experience

vSplash Techlabs Private Limited- Hyderabad, TG

Jul 2025 – Sep 2026

Project: AI-Powered SEO Audit Automation | **Clients:** GoDaddy, Salesforce

Python Developer - III | R & D Automation Team, Engineering

- Developed and Deployed an **AI-Powered SEO Audit Automation platform** using Python, FastAPI, GenAI, LLM, CI/CD, Docker, uvicorn, Nginx, MySQL.
- Built a RAG(FAISS) indexing pipeline to extract text from PDF documents, split content into chunks, generate embeddings, and store vectors in FAISS for efficient semantic search.
- Implemented **hybrid-based retrieval** to retrieve relevant SEO guidelines and contextual audit data, increasing LLM response accuracy.
- Built **Automated AI workflows** to analyze SEO issues, retrieve relevant audit data, select appropriate actions using tools and APIs, and generate SEO recommendations using **LLM, RAG, LangChain and LangGraph**.
- Deployed MLflow via Docker to track LLM observability and monitoring API latency, token usage, and execution costs with execution logs persisted to MongoDB.
- Developed asynchronous and background processing workflows using **redis** for handling large-scale audit operations.
- Implemented AWS S3 storage for generated pre-audit and post-audit reports, enabling scalable report management and easy access to audit results.
- Processed 20,000+ audit orders per month and delivered approximately 240,000+ orders through scalable background workflows and automation.

Deep Cognition India Pvt. Ltd – Bengaluru, KA

May 2023 – Jul 2025

Product Name: Paperentry | **Clients:** Savino SA, SALAS, VectorGL

Associate Software Engineer, Customer Success Engineer

- Built AI-based document processing workflows for document classification, extraction, generating and failure handling using **Python, OpenAI and automated retry mechanisms**.
- Built an **Agentic AI solution** for PaperEntry using LLM, and tool-based orchestration to automate document type detection, extraction, generation, report analysis using **LLM, RAG, LangChain and LangGraph, GenAI, MongoDB**.
- Developed document extraction services to extract **header fields and line-item data** from PDF documents and convert the results into structured JSON.

- Deployed Python backend services and REST APIs for an intelligent document processing platform using the uvicorn, CI/CD, Docker.
- Integrated **MLflow** for LLM Tracing across document processing pipelines, implementing automated token, cost, and API call monitoring.
- Architected and deployed an enterprise MCP (Model Context Protocol) server to expose internal document data to LibreChat agents, enabling automated billing report generation and dynamic client API sync.
- Implemented seamless data migration processes with optimized configurations, reducing operational costs.
- Enhanced the Technologies of the PaperEntry application using LLM and OpenAI for the various Document processing.
- Integrated PaperEntry with enterprise software including **CargoWise, NetCHB & MercureGate.**

Profinch Solutions Pvt Ltd. – Bengaluru, KA

Jul 2022 – May 2023

Software Consultant | **Clients:** Atumverse, Finfra

- Built modular REST APIs using Flask to streamline digital loan processing, risk assessment, and customer onboarding workflows.
- Integrated backend data pipelines and API gateways to handle high-throughput application data and automated transaction reporting.
- Containerized core microservices with Docker and deployed services on GCP, using Postman for API testing and validation.
- Implemented secure authentication protocols, input validation schemas, and database operations using SQL.

Education

B.Tech

Jul 2018 – Jun 2022

M S Ramaiah University of Applied Sciences | **CGPA: 8.84**

- Computer science and Engineering

12th / PUC

May 2017– Mar 2018

JSS RSH PU College, Vidhyagiri, Dharwad | **91.83%**

- Science

SSLC (10th)

Jun 2015– Apr 2016

Morarji Desai Residential School, Alagawadi | **94.24%**
